

CastleOak Care & Nursing Home Developer

CastleOak is a specialist developer of care homes and care villages across the UK.

Story:

CastleOak prides itself in being passionate about the care sector, the only one it has worked in since 1996.

In that time it has built over 150 care homes and 3,000 apartments for many of the UK's leading not-for-profit and commercial care operators.

Goal:

A strategic collaboration with a reliable and trustworthy partner that offers a comprehensive solution for laundries in care homes facilities.

Solution:

A 360° solution with competitive and efficient machinery is offered by Girbau UK. Additionally, support is provided by the sales engineering team for the design and layout of laundries, including recommendations to increase productivity, ensure hygiene in the area at all times, and maintain service quality. All of this is accompanied by close attention and continuous support to CastleOak and its centers.

As a leader in promoting care homes and care villages across the United Kingdom, CastleOak has built a strong reputation through its deep understanding of the specific needs of the sector. In its constant pursuit of operational excellence, CastleOak relies on Girbau UK as its strategic partner to equip the laundries of its facilities. Girbau UK, with its extensive experience in the industrial laundry sector, has become a trusted ally, providing quality solutions and expert technical support.

Every project with CastleOak begins with close collaboration from the initial design phase. CastleOak shares crucial details such as the size of the center, the number of beds, and laundry specifications, enabling Girbau UK to design customized solutions that fit perfectly with the operational and space needs of each facility.

Girbau UK's laundry designs not only meet regulatory requirements but are also optimized for maximum efficiency. From the layout of clean and dirty laundry areas to the selection of the most suitable machines, Girbau UK ensures that every detail contributes to hygienic and efficient operation.

In typical 60-bed projects, Girbau UK recommends a configuration that includes high-speed commercial washers model HS and energy-efficient gas dryers model ED. However, collaboration does not stop at the design stage. Girbau UK is committed to understanding Castleoak's, its clients' and their residents' needs, constantly adapting its solutions to ensure maximum long-term performance.

The installation of machines and necessary connections is carried out with precision and punctuality, always meeting agreed-upon deadlines. But Girbau UK's commitment does not end here. A comprehensive set of post-installation services is offered, including long-term maintenance contracts, continuous support, and comprehensive staff training, ensuring that laundries operate optimally and safely at all times.

In summary, the collaboration between Girbau UK and Castleoak is not only about equipping efficient laundries but also about providing comprehensive solutions that contribute to the well-being and comfort of residents in Castleoak's care homes.

Technical details:
