“Le Flo des Oliviers” Vended laundry Aix-les-Bains (73) - France

Olivier RUET (laundry owner)

A vended laundry focusing on welcoming and on service.

Mr Olivier Ruet wished to create something more than a traditional laundry. He wanted it to be a spacious, cosy and pleasant place where people could meet, inspired by Girbau's reference facilities which can be seen in other countries such as the United States, or even, without going so far, in Belgium, which are already very advanced in this concept, and offer more than just the simple treatment of linen. Mr Ruet quickly became seduced by the 3D project that Girbau sent him as an initial proposal.

THE CONCEPT:

In addition to the washing and drying machines, this laundry is equipped with 2 drinks

dispensers, a large TV screen, magazines available to customers and free Wifi access. Nine seats allow customers to wait comfortably in a bright and ventilated space “something that doesn't happen often” Mr Ruet points out.

Making the right decisions!

After having visited the competition, **Mr Ruet chose Girbau** due to the sturdiness of their machines and to their design, and also due to the proposal they made him. The proximity of the Girbau Group's manufacturing plant No.4 in Grésy-sur-Aix also influenced the decision positively.

The laundry room is equipped with 7 washer extractors, 3 dryers + 1 distributor of chemical products and 1 central payment unit. The choice of the machine's capacities was designed to respond optimally to the expectations of a clientele related to the spa and tourist activity in the city, which has many tourist apartments that generate significant volumes. The decision to install a 23kg washing machine was, according to him, crucial, and this was soon shown to have been a good decision, since it has not stopped working since the opening of the laundry.
